

## Underwater Altimeter

- This underwater altimeter is designed for measure the altitude of underwater vehicles (AUV/ROV) above the seabed. It can also be used for other applications such as positioning calibration, under ice measurements etc.

SPECIFICATION	
Transmitting Frequency	400kHz
Measurement Range	0.5m~30m
Resolution	1cm
Pulse Repetition Rate	0.3sec
Digital Output	RS232C Cable
Maximum Operating Depth	3000m
Power Supply	DC24V /0.5A
Outline Dimensions	φ 92mm × L380mm
